Thank you for purchasing our product. Please read the instruction manual carefully before using the product for the first time. If you leave the product to third parties, this operating manual must also be handed over. Keep the instruction manual for later reference. The drawings in this guide may not match the physical objects. Please refer to the physical objects.

## 1. Safety Instructions

1.1 Explanation of the symbols

Warning of electrical voltage!

**Warning!** Read the safety instructions carefully. Failure to follow the safety precautions could result in serious injury or damage. Keep the operating instructions in a safe place.

#### This product **must not** be disposed of with household waste!

By means of a CE marking, it can be recognized that a product complies with the legal requirements of European legal standards and therefore may be traded within the European Community.

Restriction of the use of certain hazardous substances in the field of heavy metals, brominated flame retardants and plasticisers to protect human health and the environment.

This product has been tested and certified Intertek. The symbol "GS" stands for tested safety. Products marked with this symbol comply with the requirements of the German Product Safety Act (ProdSG).

#### 1.2 Safety Warnings

- The device must not be used by children under 16 years of age or persons with reduced physical, sensory or mental abilities or lack of experience and/or knowledge.
- Risk of suffocation Do not allow children to play with the device.
- Do not operate the device in rooms where there is a risk of explosion.
- Do not operate or handle the unit with wet or damp hands.
- Do not immerse the unit under water.
- Only use the unit under supervision.
- Check the unit for possible damage before each use. Do not use defective units or parts of the unit. In case of damage, contact a specialist or customer service.
- Never use the device if there is damage to the electrical cables or the mains connection.
- Insert the power plug into a properly fused power outlet.
- Unplug the power cord from the wall outlet by holding the power plug before performing maintenance, servicing or repair work on the equipment.

### 2. Intended Use

The device serves as an extension cable for an electrical connection. There is **no** temperature switch to prevent overheating! When in use, the drum must be unrolled completely to avoid heating or fire of the cables (inductive resistance). Unauthorized structural changes, additions or modifications to the unit are prohibited and will void the warranty. Before using the device, the user must have read and understood these operating instructions, in particular the safety instructions.

## 3. Assembly

Install the unit on the wall in accordance with the above safety regulations. Make sure, if necessary, also with qualified personnel, that the wall is suitable for mounting.

1. Drill 2x M8 holes to match the holes in the mounting bracket.

2. connect the cable drum with the trunnion to the mounting bracket.

3. pull the hose, it has 2-3 locking positions every one meter.

4.please do not pull the cable when it is completely uncoiled.

5.please hold the connectors when the cable is pulled back.

## 4. Troubleshooting

The most common malfunction is: The cable cannot be retracted automatically after the cable is fully extended.

The reason for this could be that the cable end is locked, as the stop remains in the locking point and no additional cable can be pulled out to release it.

There are two ways to solve this:

- 1. hold the cable by the yellow warning mark and pull out with a jerky movement until the cable retracts.
- 2. lay the drum with the right side down and pull the cable, until it backs off.

Problem: No current flows as soon as a device is connected.

#### Possible cause and solution:

- It could be that the thermostat has a problem due to overcharging or overheating.
- Please remove all appliances from the plug and press the small red button next to the logo

## 5. Technical Data

Model	Cable Length	Item Number	Voltage	Housing Material
AR-HE-AKA10	10 m	4260627425990	230V AC; 16A	PP
AR-HE-AKA15	15 m	4260627426003	230V AC; 16A	РР
AR-HE-AKA20	20 m	4260627426010	230V AC; 16A	PP

## 6. Environmentally friendly disposal

**Warning Danger of suffocation!** Packaging material is dangerous for children. Never let children play with packaging material.

#### 6.1 Disposal and packaging

• The packaging of your device is made of materials necessary to guarantee effective protection during transport. These materials are fully recyclable and thus reduce the environmental impact. Dispose of the packaging in a bin for recyclable materials.

#### 6.2 Disposal of waste equipment

• Waste equipment must be disposed of in accordance with the guidelines and regulations of local waste disposal. Contact your local administration via the address of the nearest recycling centre and deliver your device there.

The symbol of the crossed-out waste bin on an OLD electrical or electronic equipment states that it must not be disposed of in household waste at the end of its service life. Collection points for WASTE electrical and electronic equipment are available in your area for free returns. You can obtain the addresses from your city or local government. You can inform yourself on our website <u>www.arebos.de</u> about other return options created by us.

The separate collection of WEEE is intended to prevent reuse, recycling or other forms of recovery of WEEE, as well as the negative consequences of disposal on the environment and human health.
